November 2019

Inventor Certified User
Autodesk
April 2016

WORDS OF CHOICE

Stoic Control the controllable.	Bohemian Follow my own path.
Deliberate There are no accidents.	Contrarian I challenge the accepted.
Introspective Open to change.	Stochastic Every day is a surprise.
Philocalist Beauty is everywhere.	Implacable Always strive for more.

OBJECTIVE

I'm looking to build connections in the industry. I love working on fun side projects, but I want to build something great with the right group of people. I want my work to make a difference, so reach out if you can help me with that.

WORK EXPERIENCE

Signals Intelligence Analyst (35N)
US Army, Pensacola, FL
(September 2020 - Present)

Cryptologic Network Warfare Specialist (35Q)
US Army, Pensacola, FL
(September 2019 - September 2020)

- Maintained physical fitness to the standards of the Army.
 - Managed a post-wide marketplace for the exchange of goods.
 - Owned and moderated Delta Company's Discord server with 500+ members.
- Key Achievement:** Honors Graduate from the Joint Cyber Analysis Course.

PROJECTS

Coupon Booked
<https://couponbooked.com>
February 2019

Coupon Booked is a cross-platform gift giving application, and the most complex project I have ever attempted. After actively developing it for a year and learning a lot in the process, I recently open sourced the code due to other obligations keeping me from finishing it. I am hoping to circle back and not only add more features but run an advertising campaign.

Galley Calls
<https://github.com/ajmeese7/galley-calls>
August 2020

This project uses Node.js, Twilio, Express, and Discord.js to call NAS Pensacola's galley menu line and send the recording and transcription in Delta Company's Discord server.

Spambot
<https://github.com/ajmeese7/spambot>
November 2017

By far my most popular open source project to date, Spambot was jokingly started as a pet project. I have written much better code, but the popularity of this project has continued to increase due to the ease of use. I continually take user feedback into account and strive to implement requested features.

EDUCATION

American Military University
Associate of Science Computer Technology
(October 2020 - Present)
4.0 GPA

Zachary High School, Zachary, LA
High School Diploma Robotics
(March 2017 - May 2019)
4.49 GPA

- Team Captain and Head Programmer of FRC Team #6489, Bronco Robotics.
- One of two males chosen to represent the school at Louisiana Boy's State.
- #1 ranked male and rank 3/371 overall, placing me in the top 1%.

SKILLS

JavaScript Expert	Node.js Intermediate
React Novice	Python Novice
